Report on Internal Control Structure

We have audited the accompanying statement of account of the District Court 36-2-02, Beaver County, Pennsylvania, for the period January 1, 2023 to December 31, 2024, and have issued our report thereon dated January 13, 2026.

We conducted our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

In planning and performing our audit of the District Court 36-2-02, Beaver County, Pennsylvania, for the period January 1, 2023 to December 31, 2024, we considered the office's internal control structure to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control structure.

The management of the District Court is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of the financial statements in accordance with prescribed policies. Because of inherent limitations in any internal control

structure, errors or irregularities may nevertheless occur and not be detected. Also, future reliance on any evaluation of the structure, past or current, is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

For the internal control structure we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation. Additionally, we assessed control risk for the internal control structure. Compliance with applicable laws and regulations was considered when assessing control risk for the internal control structure.

We noted no matters involving the internal control structure and its operation that we consider reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control structure that, in our judgment, could adversely affect the office's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

A material weakness is a reportable condition in which the design or operation of one or more of the specific internal control structure elements does not reduce, to a relatively low level, the risk that material errors or irregularities affecting the financial statements being audited may occur and not be timely detected by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are considered to be material weaknesses as defined above. We noted no matters involving the internal control over financial reporting and its operation that we consider material weaknesses.

This report is intended solely for the information and use of the Office of the Controller, management, and others within the administration. This restriction is not intended to limit the distribution of this report, which is a matter of public record.

Beaver County Controller
